## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/10/04 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siler (U. S. Patent no. 6,367,593).

Siler discloses all the limitations of the claims (See figure 2) except for the screw end wall and side wall being formed in one piece. It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the screw end wall and side wall as one piece as such is merely a design choice and reduces the number of parts. Reduction of the number of parts allows for easier assembly as well as less costly manufacturing. Please see MPEP 2144.04 section IV, In re Larson, 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965).
